▶ Right Mouse on Poller Box for all available action shortcuts.

▶ To display Demographic Analysis, use Alt + 1 to Alt + 9 to switch Demographic question.

▶ To display Priority answer in sequence, use Ctrl + 1 to Ctrl + 9 to display Priority answer choices.

▪ After Polling stops or results are displayed, you can use these useful PowerPoint shortcut keys during the slide show for slides with Poller :

Function Name	Shortcut
First Slide	Home, 1+ Enter
Last Slide	End
End The Slide Show	ESC , CTRL + BREAK, or HYPHEN
Next Slide	Page Down
Previous Slide	Page Up
Next Action	Space Bar or Next Arrow or Down
Display / Close A Black Screen	B or PERIOD
Display / Close A White Screen	W or COMMA

Note:

1. PowerCom strongly recommends "Dual Monitor with Presenter's view" for slide shows. Please review Dual Monitor with Presenter's view help topics before using Dual Monitor display.

2. During the polling all shortcut keys are disabled except SpaceBar and PowerCom applicable shortcut keys.

3. When slide loses focus, the shortcut keys may not work properly. In such a situation, click the slide to gain focus, and then use the shortcut key again.

4. Customized Animation on Question Slides:
   Use with caution and use more of "With Previous" and "After Previous" than "On Click" as Start of animation.

View and Change
Address Mode | Keypad No. | Channel No.

Notes for Reply Plus:

1. Do not connect keypad to base when change the settings.
